Ashish Sahu

Staff Software Engineer / Engineering Manager

Bangalore, India

ashish.sahu.workmail@gmail.com | +91 7388564598 | https://www.linkedin.com/in/ashish-sahu-05093a14a

PROFESSIONAL SUMMARY

Software Engineering Manager/Staff Software Engineer with 6+ years of experience in fintech and enterprise environments, currently at Visa. Strong background in security automation, vulnerability management, and Python-based developments supporting regulated Data and AI systems. Hands-on engineer with experience delivering scalable automation, AI solutions and collaborating across global teams.

Technical Skills

Programming & Scripting: Python, Java 8, Shell scripting

Security & Compliance: Vulnerability Management, SSDLC, IAM Remediation, Penetration Testing Coordination, Security Controls & Compliance

Generative AI & Agentic Systems: GenAI-assisted development tools (e.g., Copilot, Cline, Cursor), Retrieval-Augmented Generation (RAG) architectures, Model Context Protocol (MCP) servers, Agentic frameworks: LangGraph, AutoGen, CrewAI

Platforms & DevOps: Linux, Docker, Kubernetes (security-focused remediation), Git, Jenkins

Cloud: AWS (foundational knowledge: EC2, IAM, Core Services)

Databases & Tools: SQL, Postman, JIRA

PROFESSIONAL EXPERIENCE

Visa — Software Engineering Manager (IC-Focused) / Staff Software Engineer

Feb 2024 – Present | Bangalore, India

- Lead hands-on security automation and vulnerability management team and initiatives for enterprise Data and AI platforms in a regulated fintech environment.
- After taking ownership of the security remediation team, designed and implemented standardized processes and automation that reduced security exception findings from ~**20**% to below **5**% across multiple platform applications in a regulated fintech environment.
- Designed and developed Python-based GenAI Agent to remediate Technical Security Requirement (TSR) findings, leveraging AI agentic frameworks and GenAI APIs, resulting in a **70**% reduction in manual remediation effort.
- Led the development of Python-based automation frameworks to streamline security remediation, resulting in a 30% reduction in Qualys-reported vulnerabilities and successful audit compliance.
- Own and lead the team to drive remediation of SSDLC processes, penetration testing findings, IAM, and security control deviations in collaboration with application and platform teams securing **120**+ applications.
- Support containerized workloads by identifying and addressing vulnerabilities across Docker and Kubernetes environments.
- Collaborate with global stakeholders including cybersecurity, production support, and platform engineering teams to ensure compliance with internal and external security standards.

Visa — Senior Software Engineer

Mar 2022 – Jan 2024 | Bangalore, India

- Served as Subject Matter Expert for security remediation across Hadoop-based infrastructure and containerized services.
- Developed Python scripts and automation workflows to identify, track, and remediate vulnerabilities at scale, reducing manual effort and saving ~10 hours per week per person.
- Acted as the primary technical point of contact between application teams, cybersecurity teams, and production support.
- Led remediation planning discussions and supported execution for high-risk security findings and maintaining High-availability systems in hadoop.
- Contributed to improving security posture and operational resilience of large-scale fintech platforms.

Infosys — System Engineer

Aug 2019 – Mar 2022 | Bangalore, India

- Supported server security, compliance, and operational stability for enterprise applications.
- Collaborated with cross-functional engineering teams to enhance system performance and security.
- Assisted integrating automation and testing capabilities into application workflows using scripting tools.
- Built a strong foundation in enterprise software delivery, infrastructure support, and security best practices.

Education

Bachelor of Technology (B.Tech) – Electronics and Communication Engineering
SRM Institute of Science and Technology, Ghaziabad, Uttar Pradesh, India
Graduated First Class with Distinction

Certifications

- Artificial Intelligence and Analytics-Based Strategy: Creating Business Value – IIM Bangalore (Executive Programme)
- From Data to Decisions – IIM Bangalore (Executive Programme)
- Infosys Certified Python Associate
- Infosys Certified Java Full Stack Developer
- Infosys Global Agile Developer

Additional Information

- Comfortable working in multicultural, distributed teams
- Adaptable and quick to learn new tools and processes
- Proven ability to manage multiple priorities and meet deadlines
